To review the chemical constituents of the fruits of Artemisia capillaris. The literatures were extensively reviewed, and the main chemical constituents were summarized. A total of 87 compounds have been isolated and identified, of which 32 are reported from the fruits of artemisia capillaris for the first time. The majorities of the known compounds were phenolic compounds, terpenoids and lignans, with phenolic compounds being the most abundant. The fruits of A. capillaris are one of the most valuable resource for the isolation of bioactive compounds.Q: Rendering an SVG with a loop with a timeout - Javascript For context, this is a jsFiddle that showcases the behaviour I want. function createSVG(string, node) { var xml = document.createElementNS("", "svg"); var circle = document.createElementNS("", "circle"); circle.setAttribute("cx", 70); circle.setAttribute("cy", 60); circle.setAttribute("r", 30); circle.setAttribute("fill", "#008000"); var rect = document.createElementNS("", "rect"); rect.setAttribute("x", 300); rect.setAttribute("y", 300); rect.setAttribute("width", 50); rect.setAttribute("height", 60); rect.setAttribute("fill", "#FF0000"); node.appendChild(circle); node.appendChild(rect); xml.appendChild(circle); xml.appendChild(rect); document.body.appendChild(xml); setTimeout(function () { document.body.removeChild(xml); }, 5000); window.
