Sothink DHTML Menu Crack Keygen Free Download [Updated]

Sothink DHTML Menu is an easy-to-use application which allows you to create compelling menus for your website, enabling your visitors to quickly access all the sections. Its main advantage is that it enables you to work exclusively with graphic elements, rather than source code. Thanks to its intuitive interface and the well-organized layout, getting accustomed with the application shouldn't take long. The GUI provides easy access to all the editing tools and presents the menu structure in tree view, for easier navigation. Rich template collection The application bundles a variate set of templates that you can choose from, which comprises variate designs, compatible with any website type, be it a personal page or for business purposes. These templates can be a starting point in creating your own designs and adding them to the predefined collection. Extended customization options Menus can include multiple sub-items to comprise all the website's sections, displayed as drop-down lists. You can easily add or remove items to and from the menu, move their position or insert separators to highlight categories. The customization possibilities are endless: you can experiment with different fonts and colors, add images to buttons, alter their height and modify the containing text. You can customize the background color, adjust the transparency, add borders, set the spacing and the padding. To make your website look more appealing and interesting, you can apply certain effects to the popup menus. Furthermore, you can create static, floating, context or cross-freame menus. Generate custom DHTML menus and search-engine friendly code Sothink DHTML Menu offers various options that enable you to customize the appearance of the menu and modify its functioning mode, while enabling you to preview the project in any of the installed browsers. It can work with JavaScript and can easily generate SEO-friendly source code and a complete sitemap, based on the menu structure. Sothink DHTML Menu enables you to create compelling menus for your website, enabling your visitors to quickly access all the sections.
