## What's New In Spring Grass?

- light graphics for every element in the theme, except the title bar - many more shades of green than any theme before - easily changeable wallpapers - easily changeable quick-access buttons - easy to change between the Wallpaper and Quick-Access buttons - easily changeable window controls Fables 3 [Customizing] The EditorControls - Just add them to any form ControlExplanation is based on the game of Fable 2 3 where you can change the looks of your character and story. (The fantastic version of the game found here - controls can be enabled and disabled from the options box. If the options box is not shown the controls will be visible in the non-resizable bar above the main form. Creating the controls The controls can be added with the Form Designer by right clicking on the Controls box and selecting the Show in Designer button. You can then select which controls should be displayed and change the size of the controls to fit the form. You can change the position of each control by dragging. The Controls buttons are now on the bottom of the Controls box. For each control, right click on it and choose Popup Options. The popup box that appears will be named for the control and looks like a settings box. Right click on the box and select New to add a new tab for the settings. The settings are the same as the defaults shown below.Name: Value: Layout: Notes:Dock Control:Dock Top If you have the area, it will be shown. It requires some space to show the edges of the controls. If you dont, it will be shown centered in the form. None Dock Bottom The dock is the top edge of the form (or above the window) (same as dock Top option, above the window). If you have the area, it will be shown. It requires some space to show the edges of the controls. If you dont, it will be shown centered in the form. None Dock Middle The dock is the middle edge of the form (the same as dock Center). If you have the area, it will be shown. It requires some space to show the edges of the controls. If you dont, it will be shown centered in the form. None Dock Top If the form is smaller than the dock, it will be shown above the form. This is useful for when you don't have the space for both dockBottom and dockTop set.
