Zebra2 is a sound-design playground. The powerful, high quality (but still CPU friendly) sound engine and the numerous sound sculpting tools . What is Zebra2? Zebra2 is a sound-design tool set that allows the user to mix their own presets. What does it sound like? Zebra2 is a sound design environment that enables the user to create a rich palette of sounds that can be easily adjusted with various oscillators, and multiple effects. The user also has the freedom to distort their signals and to re-order presets, allowing for a unique sound that fits in any situation. What is the difference between Zebra2 and the legacy Zebra? The Zebra2 library is filled with much more than just presets. Along with the standard oscillators, filters, and effects, the user can also build their own oscillators, filters, and effects. With the addition of multiple oscillators and effects, multiple sources can be easily mixed. The user can even break these presets down into multiple, smaller parts,
