## TheGreenBow IPSec VPN Client Crack + Free Download For PC

TheGreenBow IPSec VPN Client is a powerful yet easy to use network application that simplifies your network security and enables you to secure remote connectivity. The software can establish point-to-point and site-to-site VPN tunnels with any available supported VPN gateway. In addition, it offers advanced VPN standards and other security features, such as DPD, manual check intervals, maximum number of retries, manual key exchange or manual key generation. It also offers VPN endpoints, such as an optional USB token and is compatible with Windows 2000/XP/2003/XP64/Vista/Win7. TheGreenBow IPSec VPN Client is intended for use in a personal or non-enterprise network environment. The application is designed for home, small and medium businesses (SMB), corporate and public networks. It can be easily installed and set up on a local or remote computer. Once installed, the software runs in your system tray. Right-clicking on the tray icon displays a menu, where you can access the 'Console', as well as the 'Connection Panel' or the configuration section. The application enables you to create and configure a new private network using the built-in wizard. The wizard can guide you step-by-step to opening a tunnel with another computer, a router or a VPN gateway. All you have to do is choose the IP or DNS address and the pre-shared key. The connection parameters can be easily modified. Thus, you can change the addresses of the VPN client and the remote host, the subnet mask, set the encryption mode and configure the alternate servers (DNS and WINS are supported). In addition, you can set the application to launch a script when the tunnel is opened or closed. The program also enables you to request and manage multiple remote sharing sessions with computers in the remote network. You can protect your tunnel connection using a USB token. TheGreenBow IPSec VPN Client includes advanced encryption algorithms, such as DES, AES etc. and authentication methods, such as MD5, SHA-1, SHA-256, IPSec, L2TP, PPTP, OpenVPN and IPsec protocols. The software also supports IKE NAT-Traversal and IPSec encryption. Furthermore, the application provides Dead Peer Detection (DPD), to check the quality of the remote connection. This feature allows you to manually set the check time interval, the maximum number or retries and the delay between retries. In conclusion, TheGreenBow

## TheGreenBow IPSec VPN Client Crack + [Mac/Win] (2022)

TheGreenBow IPSec VPN Client is a FREE VPN Client for Windows which provides secure and reliable remote access to shared resources in corporate networks. It supports both Point-to-Point and Multi-Point IPsec VPN connections. TheGreenBow IPSec VPN Client also enables you to send/receive e-mails from a remote computer. It supports SSL/TLS for secure mail transfer. TheGreenBow IPSec VPN Client enables you to create and configure a new private network using the built-in wizard, which can guide you step-by-step to opening a tunnel with another computer, a router or a VPN gateway. All you have to do is choose the IP or DNS address and the pre-shared key. The connection parameters can be easily modified. Thus, you can change the addresses of the VPN client and the remote host, the subnet mask, set the encryption mode and configure the alternate servers (DNS and WINS are supported). In addition, you can set the application to launch a script when the tunnel is opened or closed. Strong encryption algorithms (DES, AES etc.) and authentication methods (MD5, SHA-1, SHA-256), full IPSec standards configuration, IKE NAT-Traversal support and IPSec encryption are other features that this software comes with. Furthermore, you can protect your tunnel connection using a USB token. The VPN client enables you to request and manage multiple remote sharing sessions with computers in the remote network and supports SIP and VoIP traffic in the tunnel. The Dead Peer Detection (DPD) feature can be used to find inactive IKE peers, thus allowing you to manually set the check time interval, the maximum number or retries and the delay between retries. In conclusion, TheGreenBow IPSec VPN Client is a handy and easy to configure tool that you can use to secure remote connectivity in any network environment. Description: TheGreenBow IPSec VPN Client is a FREE VPN Client for Windows which provides secure and reliable remote access to shared resources in corporate networks. It supports both Point-to-Point and Multi-Point IPsec VPN connections. TheGreenBow IPSec VPN Client also enables you to send/receive e-mails from a remote computer.
